CAREER OBJECTIVE

Motivated third-year B.Tech student specializing in Computer Science and Engineering (Artificial Intelligence and Machine Learning), seeking an entry-level opportunity to build practical software development skills. Interested in becoming a full-stack developer with advanced knowledge through continuous learning, hands-on projects, and teamwork.

EDUCATION

B.Tech – Computer Science and Engineering (CSM)

Third Year | CGPA: 7.9

10th Class

Narayana Engineering College, Gudur

Current academic status

360 marks out of 600 — 60%

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (basic) **Programming:** Python (basic)

Tools: Git, GitHub, Visual Studio Code

Currently Learning: Full-stack development, backend development, databases, and advanced programming concepts.

PROJECTS

1. HorizonTechX Social Media Platform

Developed a mini social media web application as part of a full-stack development internship. The project includes user registration and login, JWT authentication, creating posts, likes, comments, user profiles, and follow/unfollow functionality. Technologies listed in the project repository include HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, JWT, Git, and GitHub.

Repository: github.com/jaswanth778899-blip/HorizonTechX_SocialMedia

2. HorizonTechX E-Commerce Website

Created a responsive e-commerce website featuring product listing, product details, shopping cart, user login and registration, order placement, order management, product search, and browsing. The repository describes frontend technologies such as HTML5, CSS3, and JavaScript, with Node.js, Express.js, and MongoDB included in the project technology stack.

Repository: github.com/jaswanth778899-blip/HorizonTechX_ECommerce

3. Panopticon – Intelligent Exam Proctoring

Worked on an AI-based intelligent exam proctoring project using machine learning. The repository contains a Jupyter Notebook and event/telemetry datasets related to exam monitoring.
